Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Anupam et al. (Anupam), U.S. Patent Pub. No. 2005/0048981.

Regarding claims 1-18, Anupam discloses a method for reconnecting a dropped telephone connection between a calling party and a called party, said telephone connection having been established by a telephone call having been initially placed by the calling party to a primary number of the called party and subsequently rerouted by a telephony server to an auxiliary number assigned to the called party, thereby establishing an inbound call from the calling party to the server and an outbound call from the server to the called party, said method comprising the steps of: monitoring the status of the inbound call; monitoring the status of the outbound call; detecting the situation where the status of the inbound call is active and the status of the outbound call is dropped; and, attempting to reestablish the telephone connection with the called party should
